

Product

BSI Granite surface products.

Manufacturer

Blake Solutions is headquartered in Memphis, TN, USA with manufacturing facilities in Vietnam.

Product Composition

BSI granite is a naturally occurring material that is quarried and fabricated in Asia.

Product Category

BSI granite is available in vanity tops, kitchen countertops, window sills, and other various top applications.

Colors

BSI granite is available in a variety of colors. Please visit our website to view images and pricing groups.

Finish

The decorative surface can be offered in a polished or honed finish.

Availability

BSI granite is available nationwide.

Application

Any interior or exterior, horizontal, and vertical surface application.

Cost

Cost varies with product category. Contact Blake Solutions for applicable costs.

Maintenance

BSI granite should be cleaned routinely with warm soapy water and soft cloth.

For kitchen applications, rinse any food or beverage residue as soon as possible: follow up with a non-acidic, non-abrasive cleaner.

To remove stubborn residue that cannot be rinsed away with soap and water, try a 50:50 solutions of isopropyl alcohol and water. If that does not work, make a paste of baking soda and water gently scrubbing with a soft cloth and rinse thoroughly.

Avoid using permanent markers or inks as they may adhere to the surface. If those items come into contact with the surface, clean first as outlined above.

Granite should be resealed periodically with a penetrating sealer.

Installation

Blake Solutions also offers full turn-key installation of all products we furnish.

Limitations

Avoid exposing granite surfaces to strong chemicals and solvents such as furniture strippers or paint thinners as these will dull the finish and might affect the color.

Warranty

BSI granite products offer a 1-year limited warranty.

Damage caused by physical or chemical abuse will not be warranted.
